NEW

*“O.novo gives me the creative
and financial leeway to plan
individualised rooms.”*

THE COLLECTION REINVENTS ITSELF.

While staying true to itself.

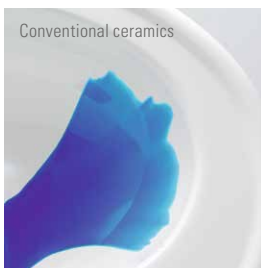

THE NEW ANGULAR SHAPE CREATES NEW POSSIBILITIES FOR PERSONALISED ROOM DESIGNS.

With a variety of sizes and variants, O.novo is a perfect match for almost every room and building project. Whether in a compact guest bathroom, a spacious bathroom in a detached/terraced house or in a residential or building complex - O.novo is the right choice for countless design concepts. With washbasins and hand washbasins in oval and angular designs, as well as numerous different sizes and installation variants, O.novo is a perfect match for every bathroom. The toilets in a linear D-shape or slightly tapering teardrop shape create additional freedom for individual designs.

O.novo also brings useful innovations to the bathroom, such as the optional CeramicPlus or AntiBac special glazes, as well as the rimless DirectFlush technology for greater hygiene and easy cleaning. O.novo means timeless design and flexibility in proven Villeroy & Boch quality with an excellent price-performance ratio.

The new angular shape allows an even wider range of designs to be realised.

With the optional CeramicPlus dirt-repellent surface, the washbasins are particularly easy to clean (see page 15).

LINEAR, NEW, O.NOVO.

The angular washbasins.

THREE SIZES, TWO INSTALLATION VARIANTS, ONE IDEA:
MORE CREATIVE FREEDOM.

Thanks to the new angular washbasins, we have expanded the O.novo collection with numerous additional options. With wall-mounted and built-in/vanity washbasins, there is an optimum solution for almost every room concept.

The right shape for every requirement. Hand washbasins that are ideal for small bathrooms.

NEW

Form follows function: These compact, wall-mounted hand washbasins offer the greatest possible freedom of movement in the smallest of spaces.

GREAT VARIETY EVEN ON A SMALL SCALE.

The new hand washbasins.

LINEAR DESIGNS ARE NOW ALSO AVAILABLE FOR YOUR GUEST TOILET.

Wherever space is limited, intelligent solutions are required. The O.novo hand washbasins in different sizes and installation variants ensure optimal use of the available space in every guest toilet or niche. In combination with the new rimless O.novo Compact washdown toilet, the space-saving hand washbasins are the perfect solution for small rooms.

An interesting interplay: The teardrop toilets create a harmonious ensemble not only with the oval washbasins, but also with the angular ones.

The DirectFlush rinsing technology cleans particularly thoroughly and saves water (see page 15).

NOW AVAILABLE IN A RIMLESS DESIGN:
The teardrop toilets.

WITH THEIR RIMLESS DIRECTFLUSH TECHNOLOGY, THESE POPULAR OVAL TOILETS ENHANCE EVERY BATHROOM.

The teardrop toilets now also benefit from the highly efficient DirectFlush flushing technology. Their rimless design also makes these toilets particularly hygienic and easy to clean. The toilets can be fitted with all standard WC seats and covers; however they make a particularly good impression when paired with the harmoniously coordinated Villeroy & Boch seats and covers.

Curved shapes radiate calm and complement a natural furnishing style.

A suitable size is available for all bathrooms and guest toilets.

THAT'S O.NOVO.
*Oval. Premium.
Cost-effective.*

THE OVAL CLASSIC CONTINUES TO SATISFY CUSTOMERS AS PART OF A HIGH-QUALITY, TIMELESS COLLECTION.

The oval washbasins of the O.novo collection are always in fashion. Their classic shape cuts an appealing figure in any location. There are also interesting combination possibilities with the new angular models.

THE FULL RANGE OF VILLEROY & BOCH

The technology behind O.novo.

WITH O.NOVO, YOU GET VILLEROY & BOCH INNOVATIONS AT AN AFFORDABLE PRICE.

Villeroy & Boch has always developed innovations that define the modern bathroom. With O.novo you benefit from these modern technologies - almost all toilets are now equipped with DirectFlush, which makes cleaning easier and reduces water consumption. Just like AquaReduct, which fulfils our customers' desire for sustainability. Furthermore, the optional AntiBac and CeramicPlus surfaces ensure hygiene and easy cleaning.

INNOVATIVE TECHNOLOGY

Aqua Reduct
Villeroy & Boch

The water-saving system makes Villeroy & Boch one of the first suppliers of a 4.5-litre toilet - with unchanged flushing performance. This innovation saves 1.5 litres of water per flushing cycle.

Direct Flush
Villeroy & Boch

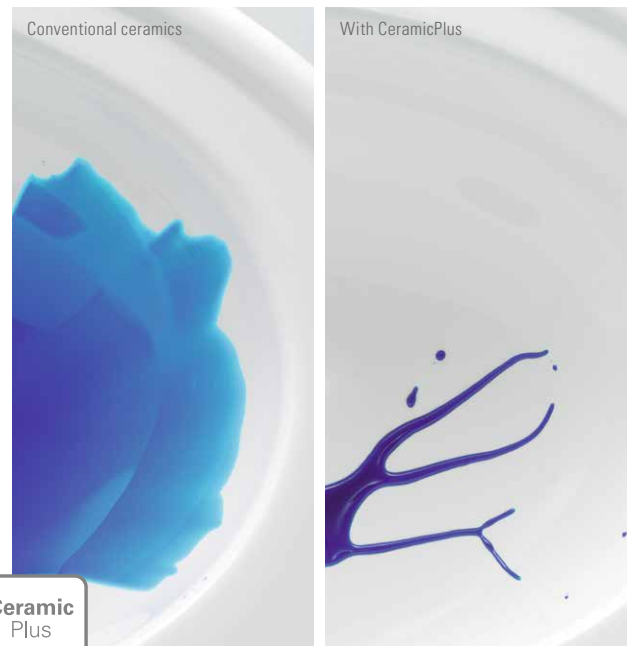

The innovative flushing technology allows quick and easy cleaning. The flush rinses the entire inner bowl cleanly and efficiently, with a precise and splash-free action. And by dispensing with the flushing rim that used to be the norm, the toilet is particularly easy and hygienic to clean.

OPTIONAL SURFACE FINISHES

AntiBac
Villeroy & Boch

The innovative surface technology has been proven to reduce bacterial growth by more than 99.9%. Practical: the antibacterial properties are integrated directly into the bathroom ceramics, thus significantly reducing the amount of chemical cleaning agents needed.

Ceramic Plus
Villeroy & Boch

The ceramic surface finish brings a decisive advantage: water droplets coalesce to form beads, which simply flow down the drain. Instead of adhering to the surface, residue such as dirt and limescale is largely flushed away.
