Made in ITALY

## the company societies.

-Men build Paini case is an example of that. Starting from a little craft made factory founded in 1954, in 50 years it has become one of the leader companies in its range. at the end of the Sixties it reached the size of a little company, in 1972 it became a joint-stock company and it was also necessary to build a more modern and equipped plant next to the one already existing. The period of wider development for the company has certainly clashed with the birth of the mixer, in the Eighties. Today Paini is a big company covering an area of about 76,000 square metres, out of which 66,000 covered, with 390 employees working in it.

## international standards

Paini products are realised following the strict international rules which require the use of high quality raw materials, production process control and single product working analysis, thus granting quality and safety.
